Recommended by architects and security experts. Compatible with any locking system on the market.

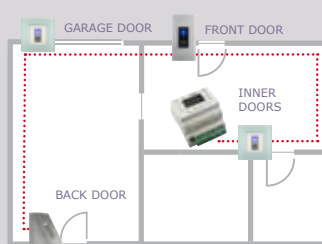

### Individual solution

Allows to control 3 functions such as opening a door, activating a security system, and the duress mode with only one finger scanner.

- Up to 99 fingers can be enrolled
- 1 to 3 relays
- Simple operation via the control panel

**It is suitable for single stand-alone basic access applications such as homes.**

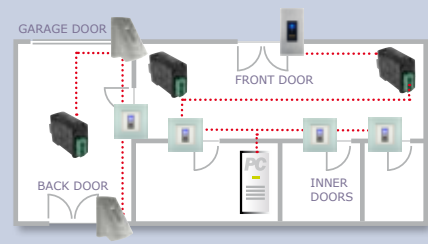

### Multiple access solution

One single control panel may control up to 4 finger scanners.

- Up to 99 fingers can be enrolled
- 4 relays
- Programmable time zones
- Access logging
- Simple operation via the control panel

**The right solution for private homes, small businesses and associations.**

### Networkable access system

The computerized access system for facilities of any size.

- Up to 2000 fingers per scanner
- Up to 4 relays
- Unlimited number of scanners
- Unlimited number of users
- Programmable time zones
- Access logging

**The right solution for businesses, government agencies and public institutions.**

Your finger is the key
